MILWAUKEE - We lead off with Republican Assembly Speaker Robin Vos' dangerously ignorant statements about climate change this week. Is the right-wing of the Republican Party the greatest threat to the survival of humanity?

Next we are joined by Citizen Action’s Healthcare Director Claire Zautke to discuss a new Georgetown study finding that Trump's sabotage of the ACA is forcing many children off health care coverage in Wisconsin and nationally. We look at new legislation for marijuana decriminalization in Wisconsin, and new research that finds Wisconsin again has the worst gap in academic achievement between black and white students.

Finally ex-Congressman Sean “Duffman” Duffy puts his foot in his mouth again, this time shamelessly questioning a decorated Army veteran's loyalty to country in an effort to circle the wagons around Donald Trump.
