MILWAUKEE - During the tenth anniversary of Act 10, we consider its legacy, what it says about the ruthlessness of modern conservatism, and the continuing ramifications of historic protests it sparked. We dig into a number of major state and federal issues, including the latest attacks on the mask mandate, a bill in Congress that would supercharge the ACA, and Governor Evers pre-budget announcements on BadgerCare Expansion, Marijuana Legalization, and Prescription Drug reform. Do these initiatives bode well for a more progressive state budget? We look at some huge federal issues in the heady early days of the Biden Administration, including COVID relief, impeachment, and protecting the housing rights of the LGBTQ community.

Finally we raise concerns about the wave of anti-Asian violence in the U.S. sparked by right-wing rhetoric, and a rogue ICE which is flaunting President Biden’s executive orders and continues to follow Trump’s immoral deportation policies.
