Gov. Tony Evers was sworn in Tuesday for his second term as the 46th governor of the state of Wisconsin during Wisconsin's 2023 Inauguration Ceremony, where he delivered his second Inaugural address.

MADISON — Gov. Tony Evers today delivered the Democratic Radio Address highlighting his second inauguration and his commitment to building a better future for Wisconsin.

[Audio File of Radio Address](#) .

Hey there, folks. Governor Tony Evers here.

I am jazzed to tell you that this week I was sworn in again as the 46th governor of this great state.

But as jazzed as I am, I am also humbled.

As a born-and-raised Wisconsinite who grew up as a scrawny kid with glasses raising Cain in Plymouth, I never dreamed I'd take an oath to be governor of the state that made me who I am, much less that I'd have the opportunity to do it twice.

To take the oath as governor is an extraordinary privilege. And each time this oath is taken, it's a profound display of democracy.

So, I am humbled and grateful for your trust, for your faith, and for your confidence.

Gov. Evers Delivers Radio Address on Second Inauguration

This week represents a defining feature and an extraordinary expression of what makes our state and our country great: that the functions of democracy are derived not from any one person, any one office, or any one party, but from all of us, together.

Our state and our country's histories are punctuated by moments just like this one—moments where we have the chance to do the right thing—not for ourselves—but for each other.

There's no question that the work we must do to build the future we want for our kids, our grandkids, and our state is only possible if we're willing to do it together. And I believe that together we will.

Wisconsin, we love you. Let's polka and then let's get on to work.

Thank you, and On, Wisconsin!
