The state's new public-private partnership is expected to double our capacity to up to 4,000 COVID-19 tests per day initially and continue to expand as additional platforms and supplies become available.

MADISON — Gov. Tony Evers announced Monday a new public-private partnership among Wisconsin industry leaders to increase Wisconsin's laboratory testing capacity for COVID-19. Prior to today's announcement, the Wisconsin State Lab of Hygiene and the Milwaukee Public Health Lab were leading the Wisconsin Clinical Lab Network labs to bring additional COVID-19 testing online.

The new partnership now includes laboratory support from Exact Sciences, Marshfield Clinic Health System, Promega, and UW Health. These organizations, along with the Wisconsin Clinical Lab Network, will now share knowledge, resources, and technology to bolster Wisconsin's testing capacity.
