

Green Jobs Bill in first 100 days?

STATEWIDE - We discuss President Trump's latest impeachment, shocking new details of his failed insurrection, and the Wisconsin Republicans who are aiding and abetting the violent overthrow of American democracy. We welcome Citizen Action Climate & Equity Director Rafael Smith to discuss a groundbreaking opportunity to pass a large New Deal-style green jobs program (Jobs for Economic Recovery Act) in the first 100 days of the Biden Administration and how you can get involved in making it a reality. The legislation, which has major traction the Senate and House, will put millions of jobless Americans back to work, dramatically improve racial equity and expand opportunity for depressed rural areas.

We also dig into Governor Evers' State of the State speech and new fissures in the Republican state legislature that resulted in Senate Republicans splitting from the Assembly by cutting a deal with the Governor on COVID-19 relief.
