DNR Sampling Results Show broader presence of PFAS in Madison Area Lakes

MADISON — Today, the Wisconsin Department of Natural Resources (DNR) announced the presence of elevated levels of per- and polyfluoroalkyl (PFAS) in surface water samples taken from Madison-area lakes and along the Yahara River. Senator Melissa Agard (D-Madison) and Representative Samba Baldeh (D-Madison) released the following statements regarding the DNR’s announcement and the need for legislative action:

Senator Melissa Agard:

“Water is life. We must protect the health and safety of all in our community. This includes taking all the steps we can to ensure that our waterways are clean and that the wildlife that depend on it are protected. The results released today by the DNR should serve as a wake-up call to the GOP as the realization of how pervasive this problem actually is. The fact that PFAS were found in samples in every lake within the Yahara Chain confirms the need for immediate and decisive action. PFAS are not only detrimental to human health, but also environmentally destructive. We must take steps to protect our health and safeguard our communities; it is imperative that everyone have access to clean water.

Legislature must take action on PFAS after latest DNR testing results

“Swift action to set comprehensive standards and remediation requirements in our state regarding PFAS pollution must be a priority to all Wisconsinites. Harmful toxins in one of our most fundamental and necessary resources is a great impairment on our communities and wildlife. It is past time to take action to mitigate this basic injustice. I am proud to be a lead author of the CLEAR Act (2019 SB 302) which establishes acceptable levels and standards, monitoring requirements, and response actions of PFAS chemicals that are harmful to our health. There is no time to waste when it comes to the health and safety of our children and families and the natural world. I call on my legislative colleagues to take up this important bill immediately.”
