

MILWAUKEE - We discuss the bold two year state budget released this week by Governor Evers which includes major healthcare proposals like a BadgerCare Public Option, Climate reforms, and other major progressive policies. Does the Governor's move towards the progressive wing of the Democratic Party show the power of public mobilization and organizing? We review Sen. QAnon Ron Johnson's shameful week denying the armed insurrection on January 6. Is our wayward Senator hell bent on making himself a national laughing stock? Switching to the Biden Administration, we discuss a very important opportunity for progressives to pass an increase in the minimum wage to \$15 in the next COVID relief bill. Finally, a new study released Thursday found the U.S. lost a whole year of life expectancy in 2020.
