Walker plans to spend \$7 Million on recruiting out of state for Foxconn workers while we are losing jobs from major employers like Kimberly Clark say Dems.

MADISON - "Taxpayers are being taxed twice for Gov. Walker's election year stunt," said **Martha Laning**

, chair of the Democratic Party of Wisconsin. "If we don't have the workers to fill Foxconn jobs, why is Walker gambling away \$4.5 billion taxpayer money to bring Foxconn here when we are losing jobs in our communities from major employers like Kimberly Clark?"

"This only serves Scott Walker, who is scrambling to paper over seven years of neglecting our state," added Laning. "Wisconsinites need a leader who will work every year of their term to make our state a place people want to live, work and grow their business."
