Actions speak louder than empty political promises and real people's lives are at stake.

MADISON - For eight years, Scott Walker has worked to sabotage the Affordable Care Act and undermine its protections for the estimated 2.4 million people in Wisconsin with a pre-existing condition.

As someone who has beat cancer, I have a pre-existing condition.

In a shocking failure to display leadership or any empathy for people suffering, Walker is currently part of a lawsuit to eliminate the Affordable Care Act (including protections for people with pre-existing conditions).

[Click here to sign my petition to demand Scott Walker drop Wisconsin from this dangerous anti-health care lawsuit.](#)

If Scott Walker wants to protect the millions of Wisconsinites with a pre-existing condition, he will take immediate action to drop Wisconsin from this lawsuit today.

Actions speak louder than empty political promises and real people's lives are at stake here. Let's see if Walker is willing to save lives, or if he's more concerned with playing politics and pleasing his right-wing donors.

[Insist Walker drop Wisconsin from the lawsuit to end the Affordable Care Act.](#)
