Group discusses the Spring Primary elections, Republicans shameful use of Koch Brother funded research on BadgerCare, Evers' new proposal to add \$28 million in the budget for women's health care, and more...

MILWAUKEE, WI - We debrief the Spring Primary elections and discuss the latest news in the important State Supreme Court election on April 2nd. The panel tears apart the junk Koch Brother funded research Republicans unveiled this week in effort to provide cover for their shameful opposition to expanding to BadgerCare Expansion. We talk about Evers' new proposal to add \$28 million in the budget for women's health care. We close with an in-depth discussion of Amazon's decision to back out of a deal to build a headquarters in New York City, and how it is dividing Democrats while providing a false narrative to Wisconsin Republicans desperately trying to defend the Foxconn implosion.
