

### ***The Ronald and the Donald Are Too Dangerous for Wisconsin Women***

---

**MIDDLETON** - Today, Russ for Wisconsin launched a new 60-second radio ad that highlights Senator Johnson's extreme positions on women's health and the absurd pride he takes in continuing to support Donald Trump for President -- even saying he'll do "everything" he can to make sure Trump wins.

As Senator Johnson desperately clings to Donald Trump's coattails in a desperate effort to save his floundering political career, he hasn't been shy about what they have in common: an extreme agenda that would endanger the health and lives of Wisconsin women.

Senator Johnson failed to denounce Trump even as the Republican presidential nominee faces at least 16 allegations of sexual assault -- and his record shows a similarly shameful attitude when it comes to women's health. Sen. Johnson has voted 7 times against funding for Planned Parenthood, which could strip access to essential medical services like cancer screenings from thousands of Wisconsin women. He supported a personhood amendment which could outlaw common forms of birth control. And he also voted against reauthorizing the Violence Against Women Act, calling it "divisive" and denying protections for victims of domestic violence. Sen. Johnson has made his position clear: he'd rather put his dark money backers and Washington special interests above the interests of Wisconsin women.

Senator Johnson and President Trump: just too dangerous for Wisconsin women.
