"I don't understand the disinformation – it's impacting our economy as well as community members," says Dr. Milosavljevic.

MADISON, Wis., – In response to Ron Johnson holding yet another dangerous disinformation event on the safety of vaccines and COVID, Wisconsin Dr. Jennifer Milosavljevic slammed Johnson for his self-serving actions that are prolonging the pandemic and slowing down the country's economic recovery.

See, in part, what Dr. Milosavljevic said below and watch the full event **here** .

"It's very disappointing that we have a senator like Ron Johnson that continues to spread disinformation about the key thing that we need to end this pandemic – which is the vaccine…The vast majority of those hospitalized in the ICU and who are dying are the unvaccinated…I don't understand the disinformation – it's impacting our economy as well as community members are getting sick and can't support their local businesses. We need to put an end to senators [time in office] like Ron Johnson who are prolonging the pandemic by spreading disinformation to our fellow Wisconsinites."
